

Swiss Quality Profiles

and more...

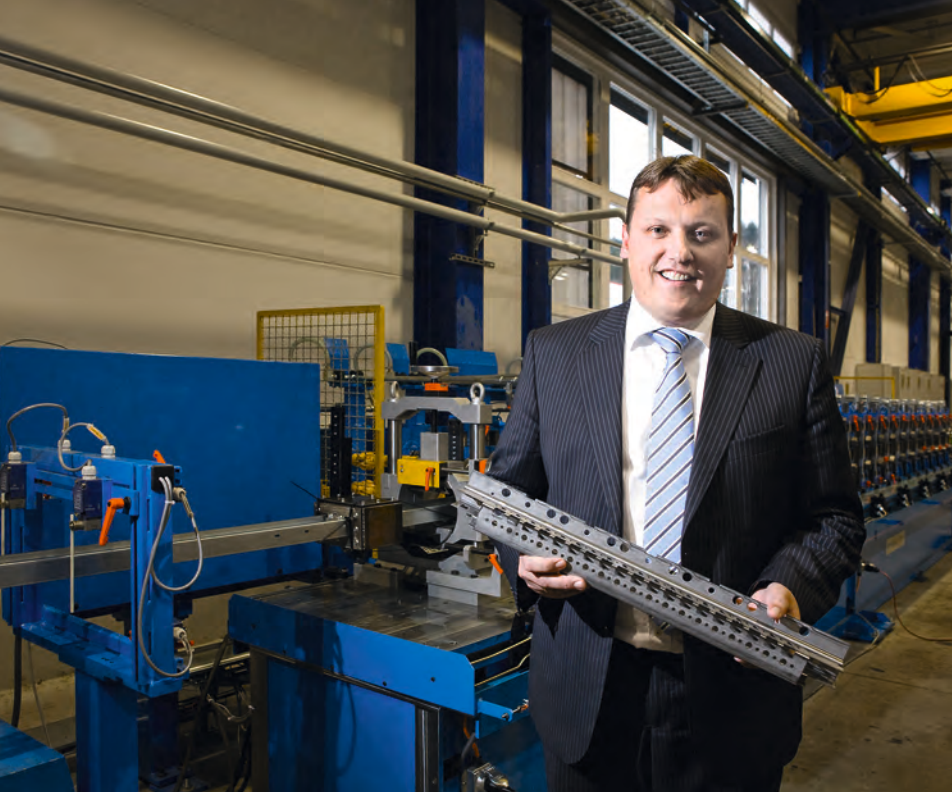

Your strong partner in your market...

and many more...

Functionality for most different applications

Daily we are confronted with new requests from our customers. Most different geometries, punching layouts, lengths and material qualities are requesting a high level of flexibility. Let us have also your demand and profit of our know-how. We have **the suitable solution** for you.

Cees Mourits

Your success is our goal

Forming AG supplies cold-rolled profiles and slit strip for a most extensive range of applications and businesses. We are present right in the heart of Europe, thanks to our location in Möhlin, close to Basel, the meeting point of Switzerland, France and Germany. Excellent links to the River Rhine, the railway network and the motorway guarantee great logistics for our customers and suppliers alike. It is with legendary Swiss quality, customer orientation, flexibility and faithfulness to deadlines that we work towards your success.

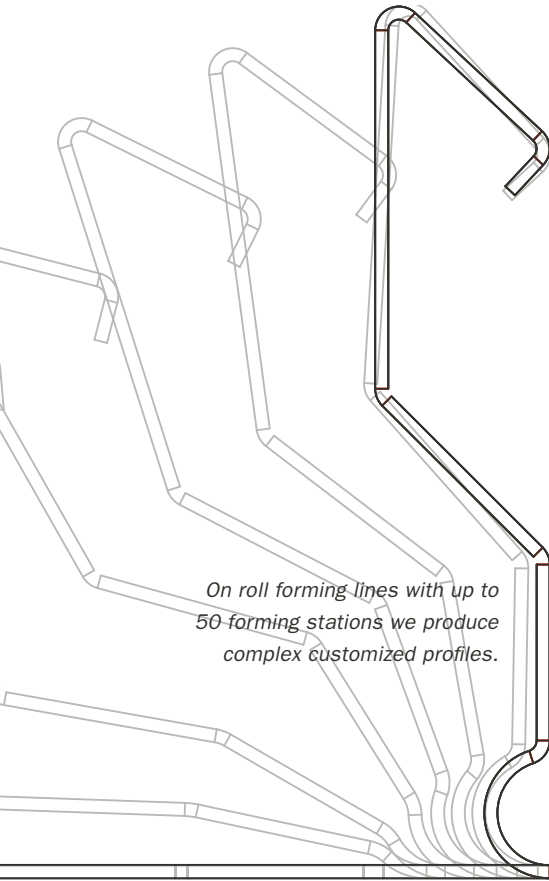

Quality, tradition, expertise and commitment

Forming has over 50 years' experience in the engineering and the production of profiles. During this time, we have produced in excess of one million tons of cold profiles in over 3,500 cross sections. Your expectations will continue to be the standard for our activities in future, too!

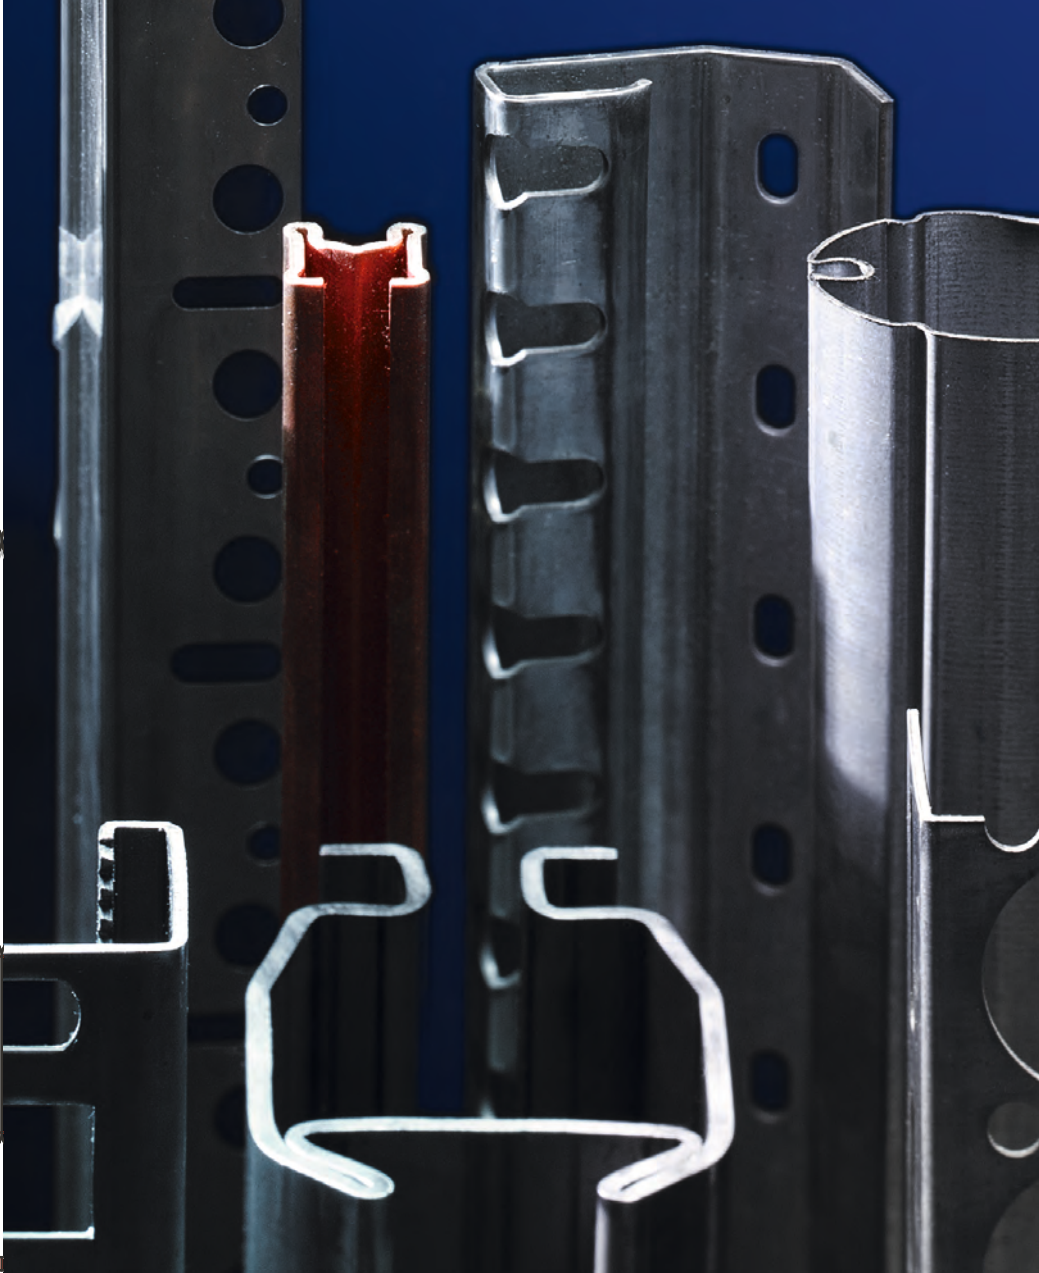

By presenting our Steel Service Centre and the Profiling Factory, we wish to create the foundation for a long-term, trusting cooperation based on a partnership.

The team at the Forming AG,
Cees Mourits

On roll forming lines with up to 50 forming stations we produce complex customized profiles.

Your profile, looking its best

The range of services offered by Forming comprises open, cold-rolled special profiles as well as closed special section tubes which can be stamped and cut beforehand or afterwards, and further processed. We realise complex special forms. Our profiling lines have up to 50 forming stations: this means almost unlimited options for your ideas to take shape.

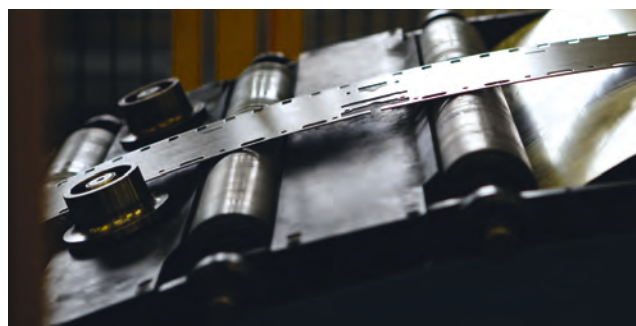

In accordance with your requirements, we process steel, stainless steel and NE steel. We have had extensive experience with stainless steel and organically coated sheet metals for visible parts. Numerous clients invite us to participate right from the planning stage with the objective of jointly developing a profile system with optimum functionality. You too can take advantage of our consultancy expertise for selecting the correct material, the right surface structure and the design of the form.

Practical experience with many branches

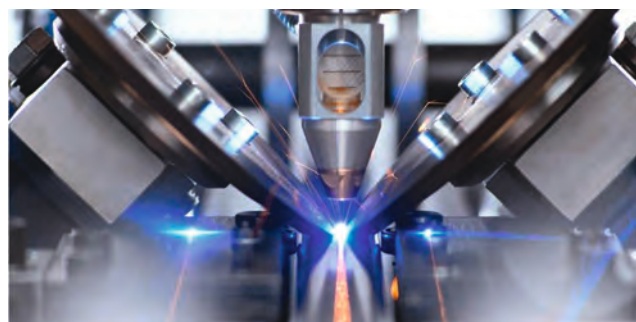

Forming is active in numerous markets and countries, and our profiles are used in the most diverse areas of application. Since long-term cooperation based on a partnership connects us with many of our clients, we have been able to consistently expand our database of application knowledge. We gladly share this know-how with our clients.

Innovation and development

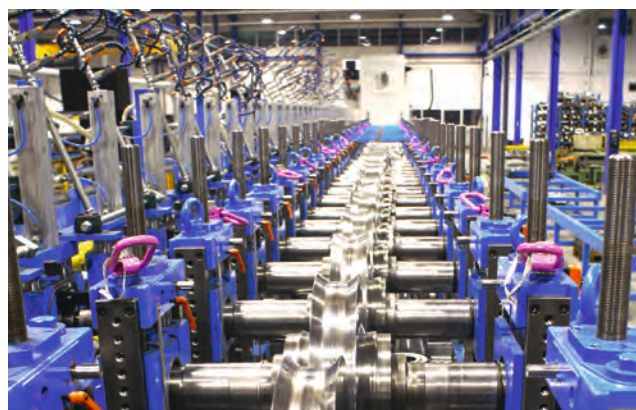

Over 50 years' experience have made us into what we are today: a competent, trustworthy partner. Despite this, we still invest in the further development of our machinery and in new process technologies, enable us to promote your best-looking profile ever for your success in the future, too!

The Steel Service Centre

The Steel Service Centre of the Forming AG has been specialising in supplying coils and slit strip since 1984. Our two slitting lines are equipped with state-of-the-art packaging machines, enabling us to package your product in accordance with your specifications. The first slitting line processes sheet metals with thicknesses between 1.5 and 12.0 mm. The second slitting line is used for materials with thicknesses between 0.3 and 3.0 mm with sensitive surfaces, such as organic coatings. We are your one-stop supplier from the coil through to the individual profile, yet we also offer contracting processing of your coils.

Processing options

We slit strips with widths between 8 and 1,560 mm and with thicknesses between 0.3 and 12.0 mm. Our range of stocks includes hotrolled, cold-rolled, galvanized, electrogalvanized and color coated coils weighing up to 36 tons. Naturally, we process your slit strips as per the required dimensions, free of burrs and low strip sag. The labels we apply to your materials bear all the necessary information to enable you to track the entire passage of your material. We supply all slit strips according to your specifications and safety requirements with standing rings and horizontal coil axis, or flat with vertical axis, with or without wooden packaging supports.

Your steel expert and advisor

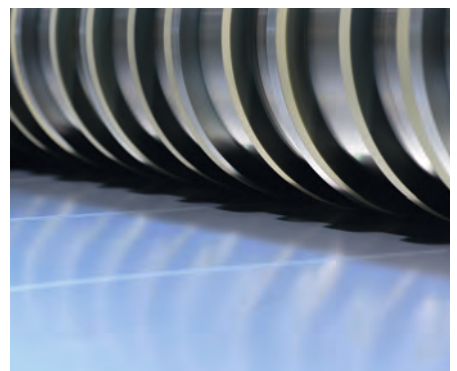

Forming doesn't want to just be your reliable supplier. Since we also process our products here in our company, this means we are in the position of providing you with expert technical advice. Our great connections with rolling factories and research institutes aid us in our selection of the right material. The selection of the right material from the start frequently saves weight or avoids the necessity of carrying out finishing processes at a later date. Talk to us about your plans: together, we will work out the optimum solution.
